

**THERMAL ENGINEERING****Course Code : 313310****Programme Name/s : Mechanical Engineering/ Production Engineering****Programme Code : ME/ PG****Semester : Third / Fourth****Course Title : THERMAL ENGINEERING****Course Code : 313310****I. RATIONALE**

Diploma holders in Mechanical Engineering are expected to take the responsibility for maintaining IC engines, steam boilers, steam turbines, steam condensers, cooling towers and other equipment in steam power plants. Understanding the fundamentals of thermodynamics is crucial to comprehending the operation and maintenance of these devices. This course emphasizes to build the foundation needed for this.

**II. INDUSTRY / EMPLOYER EXPECTED OUTCOME**

Maintain thermal engineering devices for various industrial / field applications using relevant knowledge & skills related to thermal engineering.

**III. COURSE LEVEL LEARNING OUTCOMES (COS)**

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Apply fundamental concepts of thermodynamics to various thermodynamic systems.
- CO2 - Determine various properties of steam using steam table.
- CO3 - Use suitable strategies to maintain steam boiler, steam turbine, steam condenser & cooling towers efficiently.
- CO4 - Select proper heat exchanger for given application.
- CO5 - Identify different components of an I.C. Engine.

**IV. TEACHING-LEARNING & ASSESSMENT SCHEME**

**THERMAL ENGINEERING****Course Code : 313310****Total IKS Hrs for Sem. : 0 Hrs**

Abbreviations: CL- ClassRoom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, \*# On Line Examination , @\$ Internal Online Examination

Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.\* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. \* Self learning hours shall not be reflected in the Time Table.
7. \* Self learning includes micro project / assignment / other activities.

**V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT**

| Sr.No | Theory Learning Outcomes (TLO's)aligned to CO's.   | Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.  | Suggested Learning Pedagogies.                               |
|-------|--|--|--|
| 1     | <p>TLO 1.1 Explain the various thermodynamic systems &amp; its properties with suitable example.</p> <p>TLO 1.2 Interpret various laws of thermodynamics.</p> <p>TLO 1.3 Maintain various thermodynamic devices by using laws of thermodynamics.</p>                   | <p><b>Unit - I Fundamentals of Thermodynamics</b></p> <p>1.1 Thermodynamic system, Types of systems- Open, closed &amp; isolated system, Extensive and Intensive properties, Process and Cycle. Thermodynamic definition of work, heat, difference between heat and work, flow work, concepts of enthalpy and entropy.</p> <p>1.2 Laws of Thermodynamics - Zeroth law, first law and second law of thermodynamics. Kelvin Planks, Clausius statements. Concept of Heat engine, Heat pump and Refrigerator.</p> <p>1.3 Application of Laws of Thermodynamics - Steady flow energy equation and its application to boiler, turbine, and condenser. (No Numerical Treatment on above)</p>   | Lecture Using Chalk-Board Presentations Video Demonstrations |
| 2     | <p>TLO 2.1 Illustrate Ideal gas processes on P-V &amp; T-S diagram.</p> <p>TLO 2.2 Determine work done, heat transfer, internal energy, enthalpy change for various ideal gas processes.</p> <p>TLO 2.3 Calculate different properties of steam using steam table.</p> | <p><b>Unit - II Ideal Gases and Steam Fundamentals</b></p> <p>2.1 Characteristics gas constant and universal gas constant. Derivation of characteristics gas equation.</p> <p>2.2 Ideal gas processes – Isobaric, Isochoric, Isothermal, Isentropic, Polytropic and their representation on P-V and T-S diagrams. Determination of work, heat, internal energy, enthalpy change. (only simple numerical based on above).</p> <p>2.3 Steam fundamentals - Applications of steam, generation of steam at constant pressure with representation on T-H &amp; T-S chart. Types of steam: Wet, dry, superheated steam. Properties of steam: Sensible, latent , total heat, specific Volume, dryness fraction. use of steam table. (Only simple numericals based on above). Rankine Cycle &amp; its representation on P-V &amp; T-S chart. (No numerical on Rankine cycle)</p> | Lecture Using Chalk-Board Presentations Video Demonstrations |

**THERMAL ENGINEERING**

**Note : Out of above suggestive LLOs -**

- '\*' Marked Practicals (LLOs) Are mandatory.
- Minimum 80% of above list of lab experiment are to be performed.
- Judicial mix of LLOs are to be performed to achieve desired outcomes.

**VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)****Assignment**

- Collect an information about Indian Boiler Regulation act.
- Collect an information about high pressure boilers used in steam power plants. Write a specification and compare each other.
- “High pressure boilers are used in steam power plants” Justify.
- Carry out comparative study of conventional cooling towers, cooling towers used in power plants and upcoming cooling tower.
- Make power point presentation including videos on heat exchangers commonly used.
- Collect an information about manufacturers of I.C. Engine with their specifications.
- Prepare a report on applications of I.C. Engine (S.I/C.I.) in various sectors.

**Micro project**

- Prepare a model of any one boiler / mounting/accessories with the help of suitable material.
- Prepare charts on compounding, regenerative feed heating processes of steam boiler.
- Collect various components of an I.C. engine and prepare a board model with its details.
- Prepare and present a seminar on boiler instrumentation using appropriate source of information.
- Prepare a report on a visit to Steam Power Plant on the basis of following parameters- a. Layout of power plant b. Specifications & type of – Steam boiler, steam turbine, Steam condenser & cooling tower. c. Construction & working of - Steam boiler, steam turbine, Steam condenser & cooling tower. d. Maintenance procedure of - Steam boiler, steam turbine, Steam condenser & cooling tower. e. List of various parameters controlled for smooth functioning.
- Prepare a model of any one heat exchanger with the help of suitable material.

**Note :**

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicial mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

**VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED**

**THERMAL ENGINEERING****Course Code : 313310**

| Sr.No | Equipment Name with Broad Specifications  | Relevant LLO Number |
|-------|---|---------------------|
| 1     | Mercury or alcohol filled Thermometer, Pressure Gauge Range max up to 8 bars, U- Tube Manometer, Rotameter – Maximum up to 20 LPM .   | 1                   |
| 2     | Charts / Models demonstrating process of compounding.   | 10                  |
| 3     | Experimental set up for determination of thermal conductivity of metallic rod consisting of Metallic rod of suitable length adequately insulated with heating arrangements at one end, Voltage regulator, Six thermocouples on metallic rod, Arrangement for cooling other end of rod, Stop watch, Measuring Jar. | 11                  |
| 4     | Experimental set up to verify Stefan Boltzmann law.   | 12                  |
| 5     | Different equipment in power engineering laboratory having heat exchangers.   | 13                  |
| 6     | Single cylinder I.C. engine suitable for Dismantling and assembling with necessary tool set .   | 14                  |
| 7     | Test rig of multicylinder I.C. Engine available in laboratory.  | 15                  |
| 8     | Two stage Reciprocating air compressor with intercooler test rig.   | 2                   |
| 9     | Cut section models of fire tube boilers.  | 3                   |
| 10    | Cut section models of water tube boilers.   | 4                   |
| 11    | Cut section models of various boiler mountings.   | 5                   |
| 12    | Cut section models of various boiler accessories.   | 6                   |
| 13    | Cut section models of Impulse & Reaction turbine.   | 7                   |
| 14    | Cut section models of various water cooled & air-cooled condensers.   | 8                   |
| 15    | Relevant simulation software.   | 9                   |

**IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)**
